The aim of *Café Vending (Fairtrade)* is to promote Fairtrade produce in the workplace by supplying Fairtrade drinks vending machines to businesses.

As well as publicising Fairtrade and generating its own income, the business provides employment, and as a growing company, it intends to employ staff in regional areas.

Café Vending also operates an environmental policy which ensures the recycling of any packaging used (including cups) and the disposal of consumables as responsibly as possible.

Looking ahead, the business hopes to promote the growth and development of more Fairtrade goods, with a continued quality of service to match the quality and ethos of the product.

The future: To work with more sustainable associated groups.

Final words: "Students have shown overwhelming support for fair trade principles which is most encouraging for the future of our planet."

Status of organisation: Private business

Area: Wales and border counties
