Yn draddodiadol mae pynciau cymdeithasol, economaidd ac amgylcheddol wedi eu trin yn annibynnol. Fodd bynnag, ar gyfer Datblygiad Cynladwy, dylid yn ddelfrydol edrych ar y tair agwedd fel rhai sydd cyn bwysiced â'i gilydd, os ydym am greu cymdeithas deg lle nad ydym yn gor-ddefnyddio adnoddau'r ddaear.

Mae Prifysgol Cymru, Bangor, felly wedi datblygu cwrs gradd Datblygiad Cynladwy tair blynedd sy'n llwyr integredig. Mae myfyrwyr yn dysgu'r pethau sylfaenol am gymdeithaseg, gwyddoniaeth amgylcheddol ac economeg, ac yn gweld y problemau a'r atebion posibl wrth gyfuno ffordd o feddwl y tair disgyblaeth wahanol yma.

SUSTAINABLE DEVELOPMENT DEGREE COURSE

Traditionally, social, economic and environmental subjects have been treated independently. However, for Sustainable Development, all three aspects should ideally be seen as being of equal importance, if we are to create a just society where we do not over-use the earth's resources.

The University of Wales, Bangor has therefore developed a three-year fully integrated Sustainable Development degree course. Students learn the basics of sociology, environmental science and economics, and see the problems and possible solutions when combining thinking from these distinct disciplines.
