The World Education Centre works with schools and colleges in North Wales to promote awareness amongst teachers and pupils of global citizenship and sustainable development issues.

Individuals and organisations are able to contribute to the running and development of this project by becoming members, and, if appropriate, be elected to the Management Committee.

As well as providing a service to assist with education in sustainable development and global citizenship in schools the Centre has a library of teaching resources. A three-year Department for International Development projects aims to include sustainable development and global citizenship education as a core part of courses for teachers – at all levels.

This work is intended to ensure a high standard of education in the subjects in schools and colleges, and that sustainable development and global citizenship becomes part of the daily lives of teachers and their pupils.
